

Varn Defoamer

Anti-foam additive for dampening systems

Varn Defoamer reduces or completely eliminates excessive foaming in dampening systems. It is highly effective and economical - usually one capful will be sufficient.

Varn Defoamer prevents air bubbles being transferred to the plate cylinder, which can produce dry spots on the plate.

Varn Defoamer is compatible with all types of fount solution concentrate.

Varn Defoamer is non-toxic and non-flammable.

Features	Advantages	Benefits	Product Benefits
Eliminates foaming of fount solution.	Allows thin, uniform layer of fount solution to be applied to plate.	Improved print quality.	<ul style="list-style-type: none"> • Improves print quality. • Active anti-foaming agents. • Economical in use. • Highly water miscible. • Non-flammable.
Concentrated formula.	Low dosage.	Economical in use.	
Blend of highly active anti-foaming agents.	Effective against all types of foam.	Compatible with all fount solutions.	
Highly water miscible.	Dilutes instantly.	Easy to use.	

Directions for use

Add one capful (10ml) Varn Defoamer per 100 litres of mixed dampening solution.
