

Varn Sunday Fount

Fount solution

Varn Sunday Fount is a specially formulated fount solution to meet the exacting demands of modern high speed Heatset Web Offset Presses.

Varn Sunday Fount is the result of extensive research and development in the interaction of fount and ink at high speeds i.e. >15 mp/s.

Varn Sunday Fount incorporates dynamic surface tension properties which gives the printer the latitude normally associated with alcohol but without any environmental risks.

Varn Sunday Fount has been formulated to meet the demands of modern plate technology including CtP and is compatible with the majority of negative and positive (baked) plates.

Varn Sunday Fount is an extremely clean running fount solution, minimising ink feedback onto dampers and into re-circulating tanks.

Features	Advantages	Benefits	Product Benefits
Dynamic surface tension properties.	Reproduces the advantages of alcohol, without detriment to the environment. Effective ink/water balance. Reduces ink feedback to the dampening system. Eliminates piling.	Safer working environment. Gives printer the latitude he had with alcohol. Cleaner running and reduced down-time. Fewer blanket washes, therefore less waste and increased production time.	<ul style="list-style-type: none"> • Eliminates alcohol. • Reduces waste. • Proven performance >15mp/s. • Technically compatible with Day International sleeves. • Minimise ink feedback into dampeners.
Flashpoint above 100°C.	Safer handling and storage properties. Classified as non-hazardous.	Complies with health and safety legislation requirements. Safer pressroom conditions.	
Compatible with the majority of inks, stocks and water conditions.	Increased flexibility in choice of consumables.	Cost savings.	

Directions for use

For optimum economy and performance use in conjunction with Varn Graphic Arts Doser DI-150. Dosage between 2 and 4% depending on local water conditions.
