

# Varn Super Rubber Rejuvenator

## Rubber blanket & roller rejuvenator

Varn Super Rubber Rejuvenator cleans and deglazes rubber faster and more completely while restoring new life and printability to even the most glaze-blocked blankets and rollers. This excellent rejuvenator will pay for itself many times over in increased productivity and extended roller and blanket life.

Varn Super Rubber Rejuvenator will remove all glaze caused by friction, ink and stock coatings as well as light embossing and oxidation.

Varn Super Rubber Rejuvenator will restore original colour to blankets and rollers, reproducing the nap of rubber compounds, optimising ink transfer.

Varn Super Rubber Rejuvenator incorporates two beneficial features - fast drying and high flash point. This unusual combination produces a safe, effective cleaning method.

Features	Advantages	Benefits	Product Benefits
Rejuvenates and deglazes rubber compounds.	Optimises working life of blankets and rollers.	Reduced press downtime. Reduced expense.	<ul style="list-style-type: none"> <li>• Economical in use.</li> <li>• Extends working life of blankets and rollers.</li> <li>• Optimises ink transfer properties of blankets and rollers.</li> <li>• Fast effective deep cleansing of blankets and rollers.</li> <li>• Restores original rubber texture.</li> </ul>
Restores original nap.	Optimises ink transfer.	Improved, consistent print quality.	
Deep cleans rollers with one application.	Faster colour changes.	Increased production.	

## Directions for use

Blankets:

Use as a normal manual wash-up after long runs, when changing from dark to light ink and as part of a daily maintenance programme. Because of fast drying speed and outstanding cleaning action, a blanket maintenance wash actually takes less time than a regular wash.

Rollers:

Outstanding for hand cleaning rubber and steel rollers out of the press and the cleaning of roller ends on the press. While Varn Super Rubber Rejuvenator dries too fast for most regular roller wash-ups, it may be added to a regular Varn wash up solution to improve cleaning action and increase drying speed as part of a maintenance wash-up programme.

Rubber parts:

The periodic use of Varn Super Rubber Rejuvenator will add new life to feeder rollers on press and on folders, suction cups and other rubber parts used in both printing and general industry.

Not recommended for use on urethane rollers.

## Packaging

**10  
Litres**

**Day International**  
Varn House, Northbank Industrial Park,  
Irlam, Greater Manchester,  
M44 5BL, England.
