

Varn Supreme

Fount solution

Varn Supreme is a complete product that prints sharper and will give clean, quick start-ups with a definite reduction in ink consumption. Because less ink and water are run, ink comes off the press drier and denser colours are obtained.

Conscious of the health and safety of the printer, Varn Supreme incorporates sophisticated technology to produce a fount solution with an effective preservative system that will inhibit bacteria growth in pipes, fount pans or in the water system. This technology does not contain formaldehyde.

Varn Supreme is a non-foaming, fully biodegradable alcohol reduction system. Alcohol can be reduced to 5% and, in many cases, can be eliminated.

Features	Advantages	Benefits	Product Benefits
Minimal damp.	Reduced ink build-up on impression cylinders. Improved ink drying.	Reduced wash-ups of impression cylinder. Reduced set-off.	<ul style="list-style-type: none"> • Alcohol reduced or eliminated. • Improved desensitising properties. • Runs with less water and ink. • Quicker start ups. • Assists ink drying.
Improved wetting system.	Reduced alcohol consumption. Reduced VOCs.	Denser colours. Increased ink mileage. Environmentally friendly.	
Stable buffer system.	Accurate control of pH.	Consistent print quality.	
Non-foaming.	Better dampening solution control.	Reduced waste.	

Directions for use

For optimum economy and performance use in conjunction with Varn Graphic Arts Doser DI-150. Dosage between 2 and 4% depending on local water conditions.
