

# Varn UV Wash

## All UV roller & blanket wash

Varn's Research and Development Laboratory in Europe worked with leading ink, roller and blanket manufacturers to produce a low toxic, low swell roller and blanket cleaner especially designed for U.V. inks.

Varn UV Wash has unique anti-corrosion additives and is water miscible to remove glaze and piling. It has a very low swell advantage on EPDM and nitrile rubber compounds.

Varn UV Wash should not be confused with competitive U.V. washes on the market which attack the rubber surfaces causing swell on rollers and delamination of blankets. It should NOT be used for oil-based inks.

Features	Advantages	Benefits	Product Benefits
Specially formulated for UV inks.	Superior performance on UV presses.	Ease of application.	<ul style="list-style-type: none"> <li>• Specially formulated for UV inks.</li> </ul>
Water miscible.	Easily removes both water soluble and solvent soluble glaze, blanket piling and lint.	One application removes all debris.	<ul style="list-style-type: none"> <li>• Low swell on EPDM and nitrile PVC compounds.</li> </ul>
Low odour.	User friendly.	Pleasant working environment.	<ul style="list-style-type: none"> <li>• Environmentally friendly.</li> <li>• Low odour.</li> </ul>
Low rubber swell.	Extends roller & blanket life.	Cost effective.	<ul style="list-style-type: none"> <li>• Water miscible.</li> <li>• OEM approved.</li> </ul>

## Directions for use

Blankets:

Mix with up to 10% water or apply to a dampened wash-up cloth to remove both water soluble and solvent soluble glaze, blanket piling and lint.

Rollers:

Use neat or mix with up to 10% water to remove gum glaze, paper fibres and lint.

For optimum performance use in conjunction with Varn Take It Off/Revitol and Varn Calcium Deglazer as part of a regular press maintenance system.

Do not use on unbaked positive plates.
